## LISTING OF THE CLAIMS

- (previously presented) An isolated nucleic acid comprising a nucleotide sequence encoding an S. epidermidis polypeptide of SEQ ID NO:5607.
- (original) A recombinant expression vector comprising the nucleic acid of claim 1
   operably linked to a transcription regulatory element.
- 3. (original) A cell comprising a recombinant expression vector of claim 2.
- 4. (original) A method for producing an S. epidermidis polypeptide comprising culturing a cell of claim 3 under conditions that permit expression of the polypeptide.
- 5. (previously presented) An isolated nucleic acid comprising a nucleotide sequence of SEQ ID NO:1835, or its complement, wherein said nucleic acid encodesan S.
  epidermidis polypeptide or a fragment of at least twenty amino acid residues.
- (original) A recombinant expression vector comprising the nucleic acid of claim 5
   operably linked to a transcription regulatory element.
- 7. (original) A cell comprising a recombinant expression vector of claim 6.
- 8. (original) A method for producing an S. epidermidis polypeptide comprising culturing a cell of claim 7 under conditions that permit expression of the polypeptide.
- (previously presented) A probe comprising a nucleotide sequence consisting of at least forty contiguous nucleotides of a nucleotide sequence of SEQ ID NO:1835 or it complement.

-4-

10. (previously presented) An isolated nucleotide acid comprising a nucleotide sequence of at least one hundred nucleotides in length, wherein the sequence is hybridizable under high stringency conditions to a nucleic acid having a nucleotide sequence of SEQ ID NO:1835 or its complement.

## 11-31. Cancelled.

32. (previously presented) An isolated nucleic acid comprising a nucleotide sequence, wherein the nucleotide sequence is hybridizable under high stringency conditions to SEQ ID NO:1835 or its complement.
